The mile is an English unit of length of linear measure equal to 5,280 feet, or 1,760 yards, and standardised as exactly 1,609.344 metres by international agreement in 1959.

Mile - Wikipedia

Mile, any of various units of distance, such as the statute mile of 5,280 feet (1.609 km). It originated from the Roman mille passus, or "thousand paces," which measured 5,000 Roman feet. About the year 1500 the "old London" mile was defined as eight furlongs.

The By Miles service is brilliant and delivers just what they say they do, so it's been great for us keeping a spare car at my wife's parents (that will only do a very low mileage each year) so that we can take them out when we visit. Sadly, their health has declined this year and they now have professional carers too but when we tried to add the carers to the policy (so that they could use ...
